

The Broker:

Lawrence Larsen, also known as “Laundromat Larry,” is a highly experienced laundromat owner, consultant, and broker who has become a prominent figure in the laundromat industry, particularly in Southern California.

Professional Background:

Lawrence Larsen has owned and operated over fifty laundromats, designed and built more than 135 stores, and has over fifty years of experience in millions of dollars of equipment distribution throughout the country. *California Broker DRE 49460 CA Laundromat Insurance DOI: 0553938*

Services provided:

He offers a wide range of services, including advising new owners, assisting with due diligence, expert witness services, sale of equipment, laundromat insurance and consulting on store design and management.

Background of this location:

This is a unique opportunity to develop a fluff & fold/pickup and delivery business in an existing laundromat location that is located in one of the most desirable location in Orange County, California. This is not your typical Orange County laundromat opportunity, which includes location in a low income, dense apartment, loads of parking and a heavy Hispanic location.

The owner advises that the current income is sufficient to pay all overhead costs for a walk-in laundromat but not enough income to make a significant return on the purchase price. This is a unique opportunity for a buyer to develop additional income from the hottest source of laundromats by offering fluff & fold services. The owner advises that the location in a high-income location should make this laundromat an ideal site to develop these alternate sources of income for a buyer with a plan.

As the owner of the building, he acquired ownership of the laundromat for \$200,000.00 and then invested significant additional funds for a new roof, building painting, new signs and removal of the top load equipment with Dexter washers and dryers.

The owner is willing to entertain creative proposals relating to startup reductions on rental rates and other issues from financially qualified buyers that might help add a successful fluff & fold feature to this laundromat.

Owner statement: *"Do they have experience in the laundry/fluff and fold business? If so, how long? My goal is not only to sell it but ensure the new owners are extremely successful."*

Buyer should be willing to develop a pickup & delivery and fluff & fold business in order to make enough money to justify owning this store because of market value rental rates. Not your typical laundromat location, but a great potential location for a customer service site.

Some Questions asked by Buyers of the Broker:

1. Why is the jump in the lease is so significantly high after 6 months? This is concerning when we consider the build out for the front-end fluff and fold costs.

The market rental rate for the property is \$7200 to \$7500 per month. I have requested a lower initial cost with a ramp-up to give consideration for a new owner to cover some of the initial fluff & fold and pickup and delivery expenses.

2. Why are the janitorial costs so high? Could we have a break down of what this costs? Is there a person or a service provider?

The janitorial costs are also for the cleaning and attendance paid to the laundromat worker. You can set your own hours as you see fit to operated your store. I believe the cleaning costs are reasonable.

3. Is the laundromat equipment owned outright or are there any leases in place are there warranties for the equipment?

There should have been a list of equipment attached to my previous delivery. The equipment is used and no remaining factor warranties are included or provided. All equipment is owned outright.

4. Are you willing to do a coin count/test collection for 7 to 14 days to verify the actual income of the business with the seller present? The current owner is willing to provide this collection period. Yes.

5. Does the laundromat have all required licenses and permits? As far as I know, that is correct.

When we have reached a written agreement you might check with the local building department as to Certificate of Occupancy, previous permits and the business tax (AKA business license).

6. Are there any code violations or pending inspections?

None that I am aware of exist. During inquires with the building department and code enforcement, you can confirm this assumption.

7. Any environmental concerns (water usage, waste, asbestos, underground tanks)?

Same answer as to question #6.

8. Are there vendor contracts or maintenance contracts (cleaning, soap suppliers, vending, ATM providers) that transfer?

I have no knowledge of an contracts related to the items you have mentioned.

9. How is revenue tracked (card system, manual coin collection, accounting software)?

It is a dual system with both coin and PayRange usage.

10. Are there records from the machine counters (cycle counts) to confirm volume?

Yes, to the best of my knowledge PayRange provides these records.

11. How many years are left on the current lease?

A new lease will be created, since the business owner is also the building owner. Up to 20 years in lease term available based on your financial strength.
